**Becky Mefford**

May 8, 2017

Dear Parents and Guardians,

This summer we will begin a year-long renovation of the lower elementary school. Planning for this project has been on-going since the completion and approval of the district's facility plan last year. The total project will encompass the demolition of the old elementary building, addition of a new early childhood education center and gymnasium, and renovation of the current lower elementary building. In addition, site work to replace or repair the parking lots will also begin. As you can see, this project will be an extensive construction project.

When your child returns to school in August 2017, you will be impacted by this construction. The parent drop off will be altered, parking will be limited, and the building will be under construction. We are informing you now of this renovation so that you're not surprised or confused about what will be happening. We will try to keep you informed of changes throughout the year so transitions can be as smooth as possible. We ask for your patience and flexibility during the renovation. Once completed, the students will have a beautiful facility to learn and grow.

If you have questions, please contact my office. Mr. Dan Logan and I will be the contact persons for this project. I hope you, and your children, have a great summer.

Sincerely,

Robert Stafford
